

Skin Essentials @ bod:evolve Hires National Laser Expert

Colorado's premier medical skin spa, Skin Essentials, has hired a national skin laser and aesthetics expert, Debbie Brinkman.

Denver, CO ([PRWEB](#)) January 30, 2015 -- Skin Essentials @ bod:evolve announced that Certified Laser Educator, Debbie Brinkman, has been appointed their premier Skin Essentials Manager. Debbie is an LPN, Certified Medical Assistant & Aesthetician with over 20 years in plastic surgery and skin care rejuvenation industry.

Debbie is a national certified laser instructor with extensive training in laser and skincare treatments. She develops and teaches doctors and nurses on advanced protocols for their practices. She has developed protocols for State certified laser and aesthetic training centers in Colorado and Texas.

Laser technology provides specific treatments for wrinkles, redness, acne, sunspots and skin tightening. BBL (Broad Band Light), IPL (Intense-Pulsed Light), and Photofacial technologies are quickly growing in popularity due to their speedy ability to restore skin. However, patients should seek experienced laser experts because potentially dangerous burns are becoming more common.

Debbie is passionate about educating patients on the use of skin care products and treatments to correct acne, rosacea, sun damage, and reverse the natural aging process. She has become an expertise with chemical peels, hydra facials, laser rejuvenation and acne treatments. Her extensive clients travel from all over the country for her expertise. She has even worked with world renowned Dr. Richard Fitzpatrick (founder of Skin Medica) in Carlsbad, CA on effective product ingredients.

About Skin Essentials @ bod:evolve

Skin Essentials @ bod:evolve has evolved into a sought after, all inclusive medical skin care facility which is composed of a team of two registered nurses, a licensed aesthetician and two board certified plastic surgeons.

Skin Essentials has created an environment where your exterior character will reflect your lifestyle. Skin Essentials priorities are the patient's goals, skin education, offering premium products, and exceptional customer service.
